

Dear Colleague,

It has now been a little bit more than a week that you were here in Nurnberg and participated in the "World Conference On Magic Bullets". We hope that you safely returned bringing home the original "Magic Bullet" of Paul Ehrlich and many impressions and new scientific ideas. We had approximately 1100 participants in the "World Conference" and another 700 German physicians and pharmacists participating in "Certified Continuing Education Courses". Further details may be found in the attachment and on the homepage: <http://www.ehrlich2004.org>

We wish to thank all speakers, chairmen, poster presenters and participants for making this conference a very unique one and a true "Fest" of Ehrlich's 150th birthday. We are receiving so many e-Mails praising highly that this conference had "a humane touch ... of high cultural attitude" and being well organized at the same time. Also our team felt that the whole conference was of such a warm, humane and very pleasant atmosphere. People had smiles on their faces making it easy for us to return this. Thank you for nice gifts from your countries. Many wrote the conference will be unforgettable and we can agree with that from this end too. Also new friendships were created and the breadth of topics lead many to see new horizons in their work.

Some technical information: We will send out "Certificates of attendance" in the next few weeks together with a CD of abstracts (updated for last minute breakers) and pictures of the conference including opening ceremony and birthday celebration party. We need to catch up with "some lab work" before we can send out. Please also visit the homepage for updates on this.

Chemotherapy: those who want to publish their work in "Chemotherapy" DO NOT SEND papers to the conference or my address. Those who have already done so please send ONLY TO publisher and resend again to:

<http://content.karger.com/ProdukteDB/produkte.asp?Aktion=JournalHome&ProduktNr=223834>

We wish you all the best in your health, personal and family life and scientific career and hope to meet you again "some when" in the future. Always feel free to visit us here in Nurnberg when you come to Germany.

Greetings from Nurnberg and thank you again for being such a wonderful conference participant.

Fritz Sorgel
and teams lead by Jurgen Bulitta and Martina Kinzig-Schippers
